INTRODUCTION

WHAT IS SMART HIRE?

A comprehensive, one-page web application designed to bridge the gap between job seekers and employers. It facilitates a seamless job search experience while providing robust management tools for administrators.

CORE PURPOSE

To create a centralized ecosystem that ensures smooth hiring processes for companies and offers a personalized, feature-rich career development platform for candidates.

PROBLEM STATEMENT

FRAGMENTED MARKET

Lack of a centralized, reliable platform makes it difficult for students and freshers to find curated job opportunities.

STUDENT STRUGGLES

No unified place for resume building, skill learning, and direct application, leading to missed opportunities.

HIRING INEFFICIENCY

Companies struggle with manual job management and filtering through irrelevant candidate applications.

PROJECT OBJECTIVES

- **Smart Recommendations:** Provide AI-driven or filtered job suggestions relevant to user profiles.
- **Career Toolkit:** Equip students with resume builders, LinkedIn guides, and soft skills training.
- **Efficient Management:** Empower admins to easily create, update, and manage job listings.
- **Holistic Growth:** Enable event participation (seminars, hackathons) for skill enhancement.

KEY FEATURES OVERVIEW

ADMIN MODULE

- Full Dashboard Control
- Job CRUD Operations
- Candidate Management

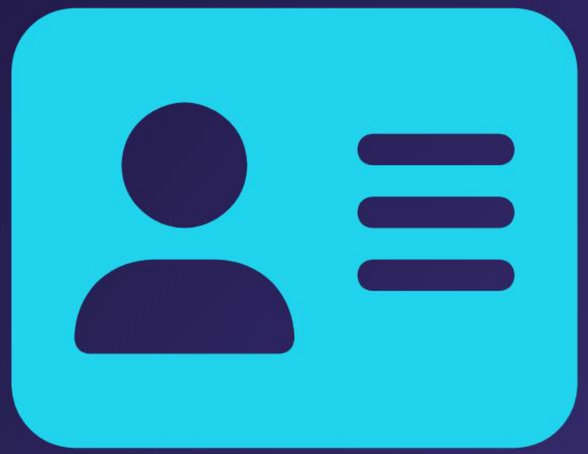
CANDIDATE MODULE

- Advanced Job Search
- Resume & Learning Tools
- Event Participation

ADMIN FEATURES

- **Job Management:** Create, Read, Update, and Delete job posts effortlessly.
- **User Control:** Ability to block or unblock candidates to maintain platform quality.
- **Resume Access:** View and download candidate resumes for vetting.
- **Event Hub:** Manage and list seminars, webinars, and hackathons.
- **Dashboard:** A comprehensive visual overview of platform statistics.

CANDIDATE FEATURES



- **Secure Access:** Easy registration and secure login via JWT.
- **Job Discovery:** View, search, and apply to relevant job openings.
- **Personalization:** Save favorites and 'like' jobs for later reference.
- **Advanced Filtering:** Sort by location, salary, experience, and work type.
- **Detailed Insights:** View comprehensive company profiles and role details.

FILTERS & SEARCH MODULE

LOCATION & CATEGORY

Filter jobs by specific cities or job domains (IT, Marketing, HR).

SALARY & EXPERIENCE

Set salary ranges and filter by years of experience (Fresher/Pro).

WORK & COMPANY TYPE

Choose between WFH, Hybrid, or Office, and Startup vs MNC.

LEARNING & CAREER TOOLS

RESUME GUIDANCE

Step-by-step tips to build an ATS-friendly, professional resume.

LINKEDIN OPTIMIZATION

Strategies to enhance profile visibility and network effectively.

SOFT SKILLS

Communication tips and interview preparation modules.

EVENT & HACKATHON MODULE

Active Participation: Candidates can view and register for various events, hackathons, and seminars directly through the portal.

Organizers: Events are curated and organized by the platform admins or partner companies.

Career Growth: Participation helps in skill building, networking, and improving the candidate's portfolio.

TECH STACK – FRONTEND

- **React.js:** Component-based UI library.
- **React Router DOM:** For seamless navigation.
- **Tailwind CSS:** Utility-first styling.
- **Bootstrap:** Responsive grid layout.
- **React-Toastify:** User notifications.
- **Formik + Yup:** Form handling & validation.

Frontend Tech Logos

TECH STACK – BACKEND

NODE.JS + EXPRESS

Robust runtime environment and web framework for scalable APIs.

MULTER

Middleware for handling `multipart/form-data` (Resume Uploads).

SECURITY

bcryptjs for password hashing and **CORS** for secure cross-origin requests.

DATABASE (MONGODB)

MongoDB Collections:

- **Users:** Stores authentication data.
- **Jobs:** 110+ job records with metadata.
- **Resumes:** File paths and details.
- **Queries:** Contact form submissions.
- **Dashboard:** User skills & internships.

SYSTEM ARCHITECTURE

- **Client Side:** React App serving Admin & Candidate panels.
- **API Layer:** Node.js/Express REST APIs handling logic.
- **Data Layer:** MongoDB storing all persistent data.
- **Modules:** Dedicated controllers for Events & Resumes.

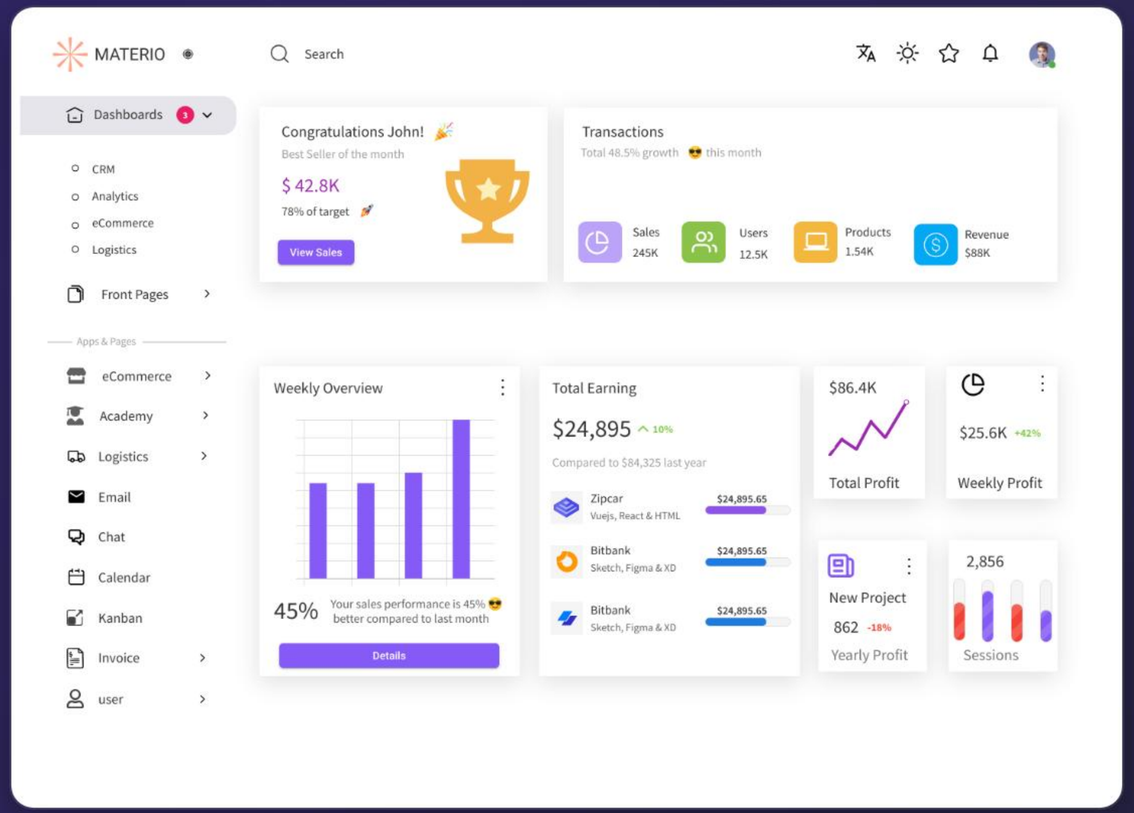
USER INTERFACE

- **Home Page:** Landing view with search bar.
- **Job Listing:** Grid view of filtered jobs.
- **Details:** In-depth job descriptions.
- **Admin Dashboard:** Graphical stats and controls.



CHALLENGES FACED

- **Data Volume:** efficiently rendering and filtering 110+ job records without lag.
- **Auth Security:** Implementing robust JWT authentication and protected routes.
- **File Handling:** Managing resume uploads securely using Multer middleware.
- **Responsiveness:** Ensuring UI consistency across different screen sizes.
- **Schema Design:** Structuring MongoDB data for optimal query performance.

FUTURE ENHANCEMENTS

AI RECOMMENDATIONS

Machine learning models to suggest jobs based on resume keywords.

COMPANY PANEL

Dedicated portal for companies to post jobs directly.

LIVE CHAT

Integrated messaging system between HR and candidates.
